DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/25/03 has been entered.

Response to Amendment

2. In the amendment filed 2/26/03 in paper number 6, the following has occurred: Claims 1 and 2 have been amended and claims 6-40 have been added. Now claims 1-40 are presented for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a system comprising a server computer having graphical user interface and client computer having a cursor-moving element to select hyperlinked images, classified in class 345, subclass 711.
- II. Claims 19-23 and 25-28, drawn to a method for selecting different starting and ending points or routes of an airline trip, classified in class 705, subclass 5.
- III. Claim 24, drawn to a method of entering biometric information in order to associated a specific user profile with the biometric information, classified in class 713, subclass 186.

Art Unit: 3626

- IV. Claims 29-40, drawn to a method of accepting user input (starting and ending points) and accepting a binding offer (airline ticket, hotel or lodging accommodations, etc...) that allows for user payment, classified in class 705, subclass 40.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Group I claims a system of using graphical user interface including tool tip (e.g., cursor position based) to control the presentation of display data. Group II claims a method for selecting starting and end points to calculate possible routes between multiple airports. Group III claims a method for collecting biometric data for identification and user profiling. Group IV claims a method of bill distribution or payment for user after accepting a binding offer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3626

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
